Chi è Abacus Group

Abacus Group è un gruppo ICT che combina connettività, servizi gestiti e capacità progettuale, per costruire e far funzionare sistemi tecnologici critici nel tempo.

Supportiamo organizzazioni pubbliche e private nel trasformare tecnologia, dati e applicazioni in affidabilità operativa, continuità del servizio e produttività misurabile.

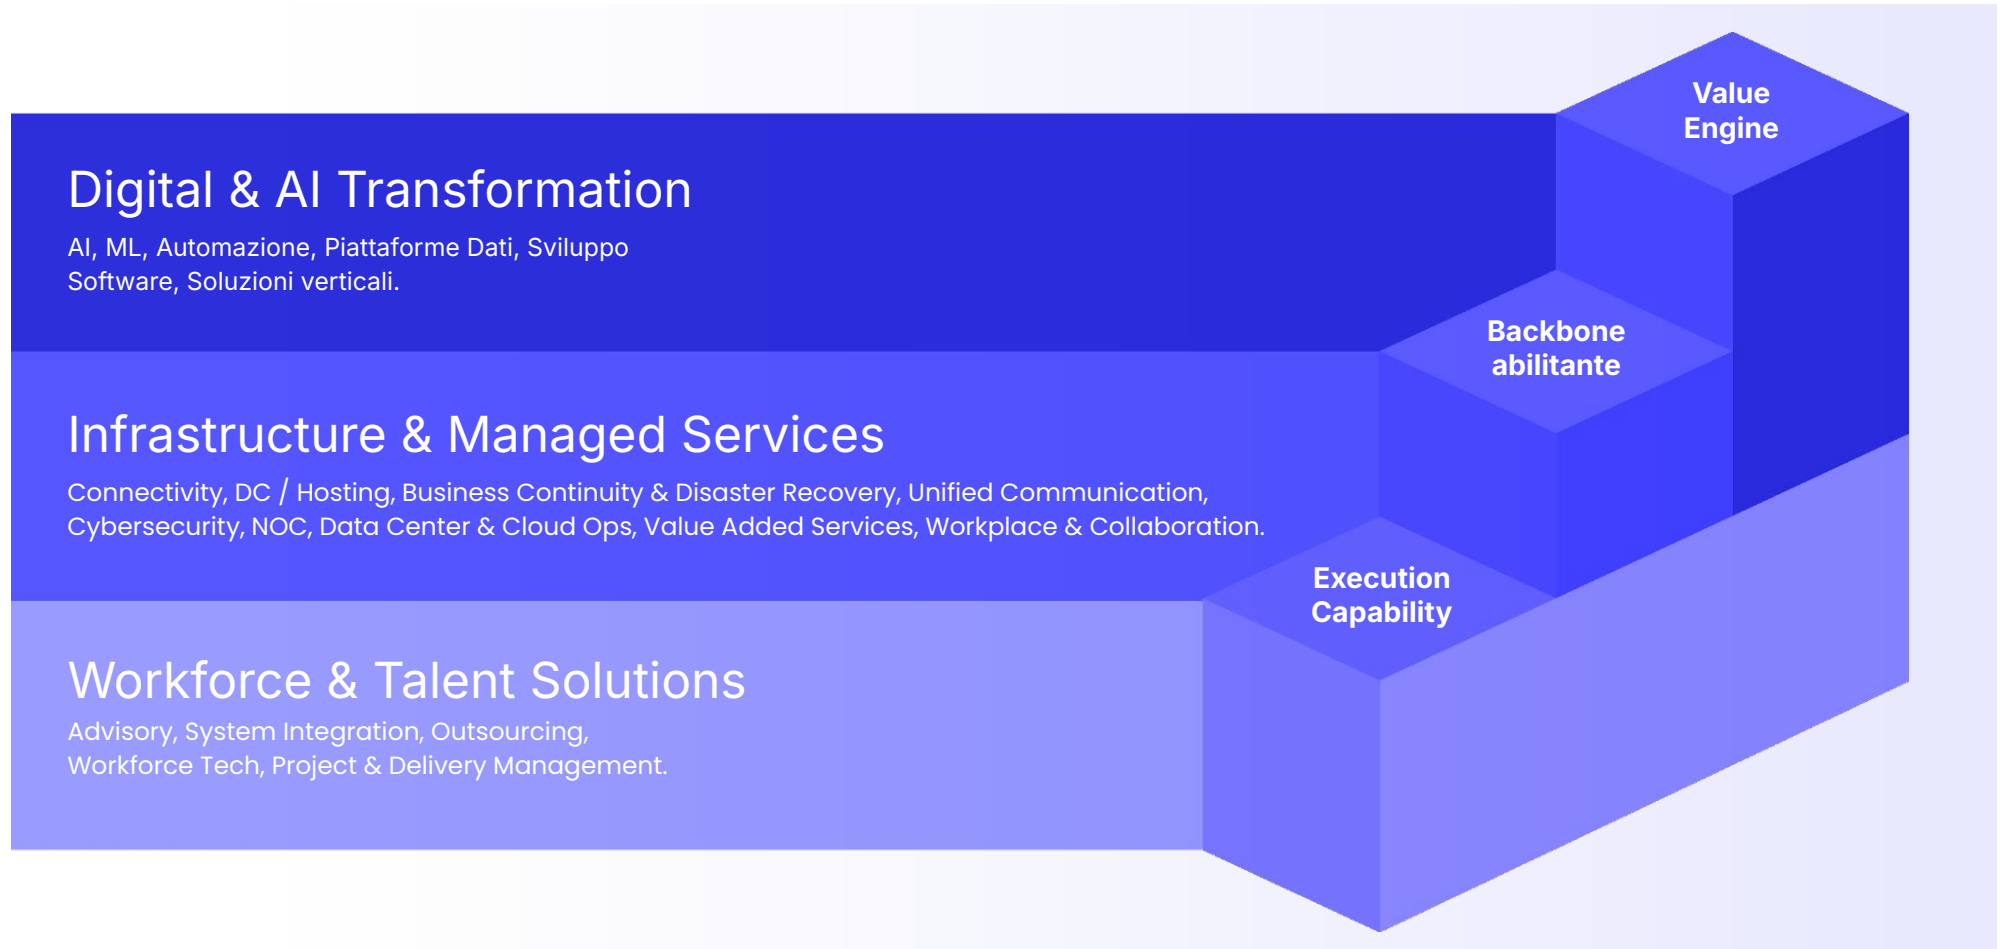

Con le competenze specialistiche del Gruppo aiutiamo le imprese a evolvere dal dato all'azione: sistemi più intelligenti, decisioni più rapide, innovazione sostenibile.

Le 3 Line of Business di Abacus Group

AI-Ready, Secure, Always-On backbone

Agentic AI That Delivers Real Business Value

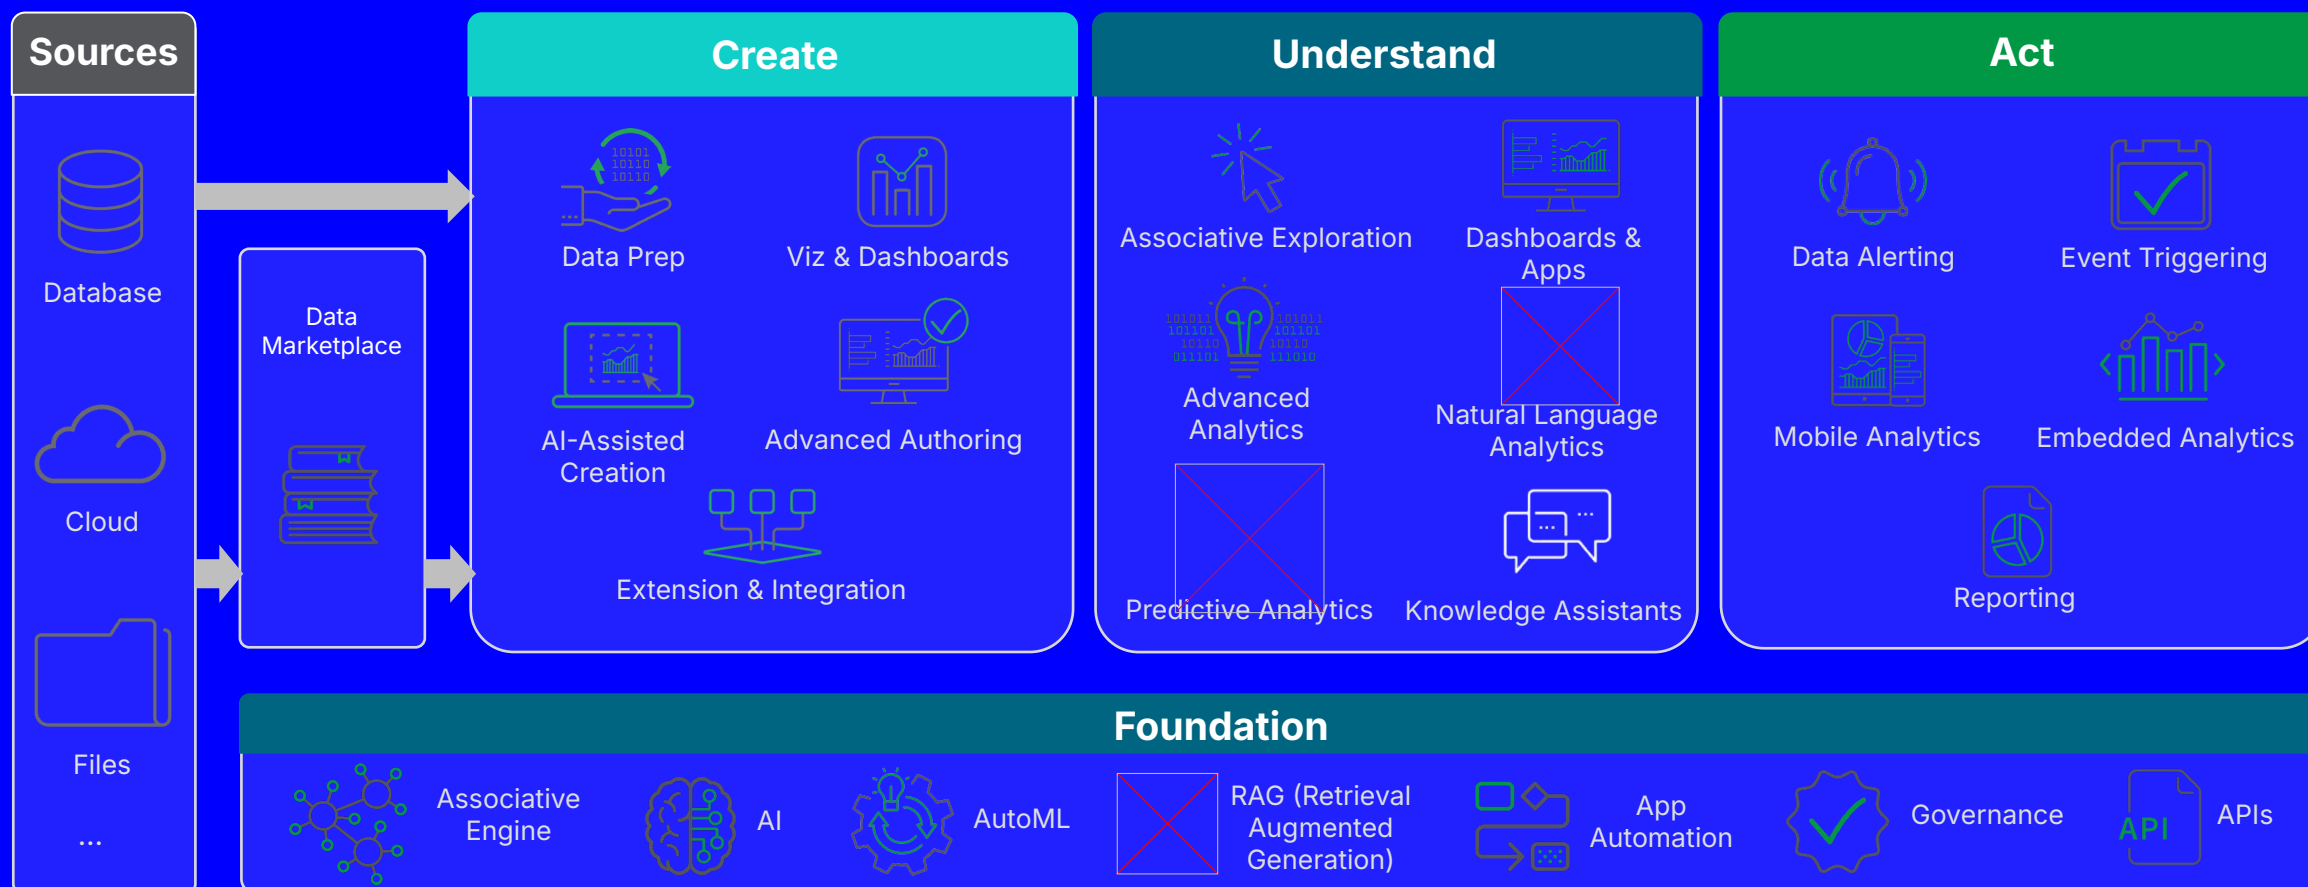

Operationalizing AI Across the Business
with trusted data, analytical context, and control

DISCLAIMER: This webinar is organized by Abacus Group and ICE, a Group company. Part of the content presented draws from Qlik's official channel enablement materials. Qlik Cloud Analytics

A complete range of AI-powered capabilities built-in

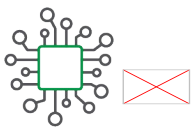

Qlik Cloud

End-to-end capabilities from data to insight to action

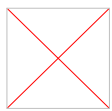

Data Integration & Quality

Data & SAP Connectors

Replication/
CDC Streaming

ELT & Data Warehouse Automation

SaaS App Connectors

ETL/Data Transformation

Data Preparation

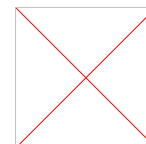

Quality & Governance

Analytics, AI and Machine Learning

Visualizations & Dashboards

AI-Powered Analytics

AutoML

Knowledge Assistants

Reporting

Alerting & Action

Embedded Analytics

Foundational Services

Catalog & Lineage

API Creation

Automation & Orchestration

Associative Engine

AI and ML

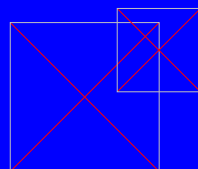

Security & Compliance

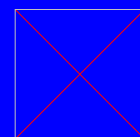

Delivering a full range of AI capabilities

Serving all types of users and use cases

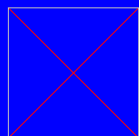

Analysis Types

AI-assisted authoring of complete analyses in a few clicks

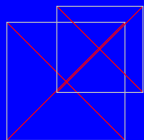

Advanced Analytics

Built-in clustering, correlation, forecasting, key drivers, etc.

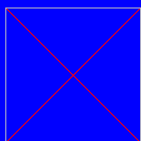

Natural Language Generation

Natural Language readouts and interpretations of charts (NLG)

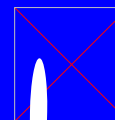

Search-based Insights

In-app insight generation driven by natural language (NLP)

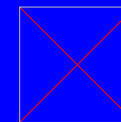

Conversational Analytics

Chat-based insight across analytics apps (NLQ)

Predictive AI

On-board AutoML to generate predictive insight with explainability

Advanced AI Integration

Real-time integration with data science and genAI platforms

GenAI Answers

RAG (retrieval augmented generation) for answers from unstructured data

AI-Powered Analytics

Associative Engine

AI & ML

* AI is Everywhere. Value is not

Only
5%
are achieving
AI value at scale

Proliferating Pilots

AI experiments multiply without cohesion

Rising Expectations

Pressure to deliver tangible ROI intensifies

Growing Complexity

Costs and technical debt accumulate

Inconsistent Impact

Business value remains elusive

Why AI **Fails** to Deliver at Scale.

AI initiatives stall because they're disconnected from operational reality. They lack:

Trusted, Governed Data

Without data quality and governance, AI amplifies noise

Analytical Context

Missing business logic means AI can't reason effectively

Operational Workflows

AI insights that don't integrate where decisions happen get ignored

Cost Controls

Unmanaged usage and spending kill enterprise adoption

The issue isn't AI capability. **It's operational readiness.**

Qlik Answer

Elevate decision making and productivity through agentic AI

Transform Decision Making

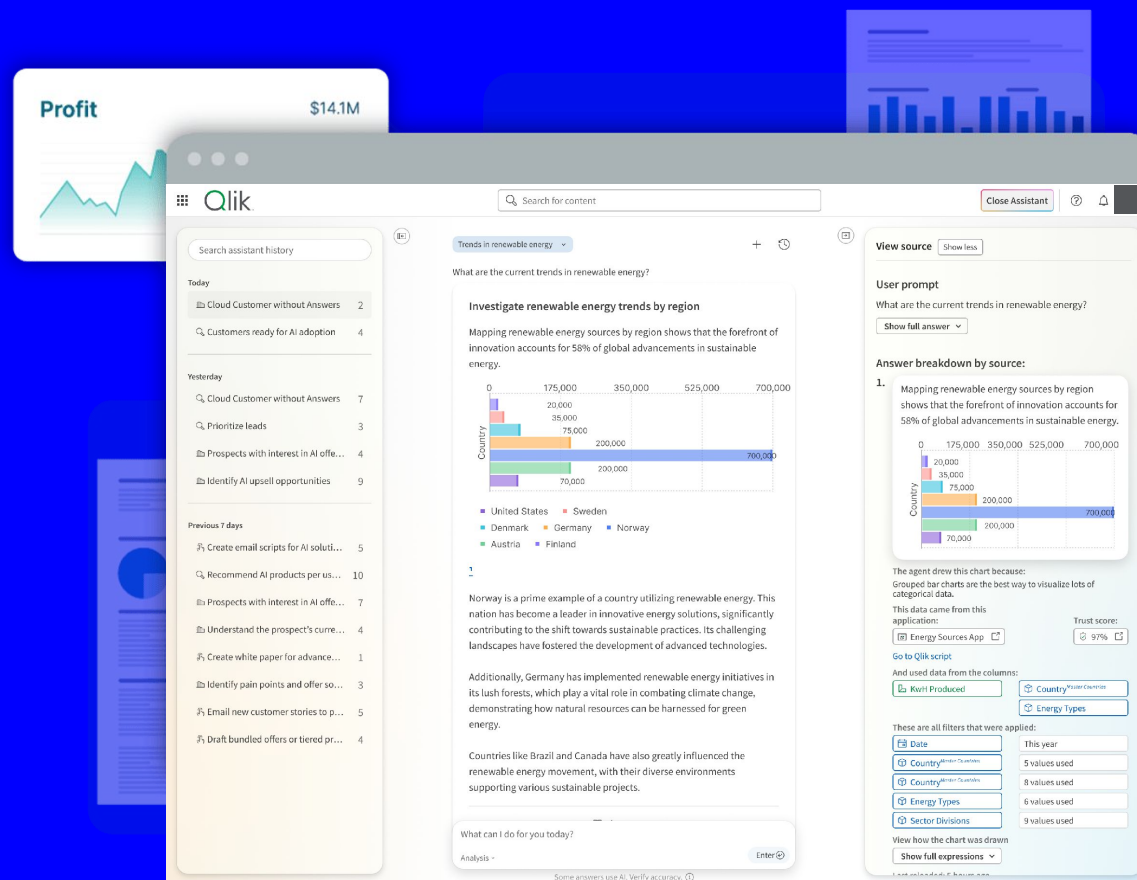

Deliver the most complete and relevant insights from all your data, with full context, transparency, and trust

Your Productivity Powerhouse

Help every user in Qlik and beyond become more efficient through assistance and automation

A Cutting-Edge Agentic Experience

Unleash the power of a best-in-class, multi-agent AI architecture with fast, plug-and-play deployment

Imagine an intelligence ai assistant

Working like an "on-demand" business analyst

Structured Data

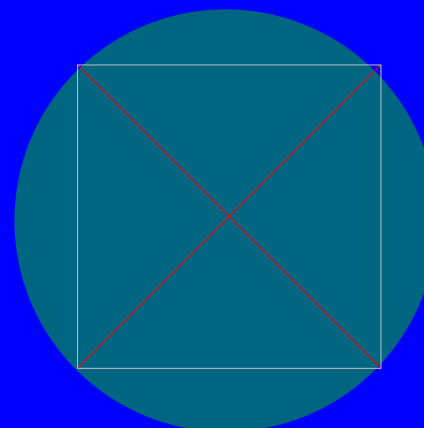

Insight from the Qlik analytics engine

+

Unstructured Data

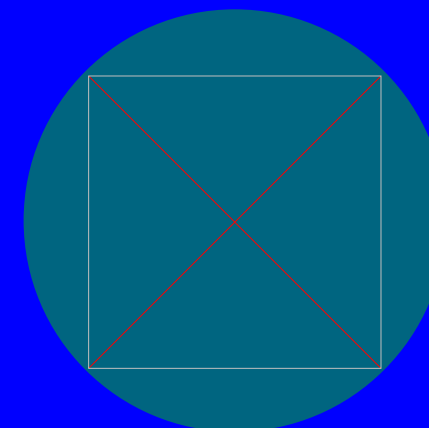

Knowledge from content and documents

+

World Class Ai

Reasoning and assistance from LLMs

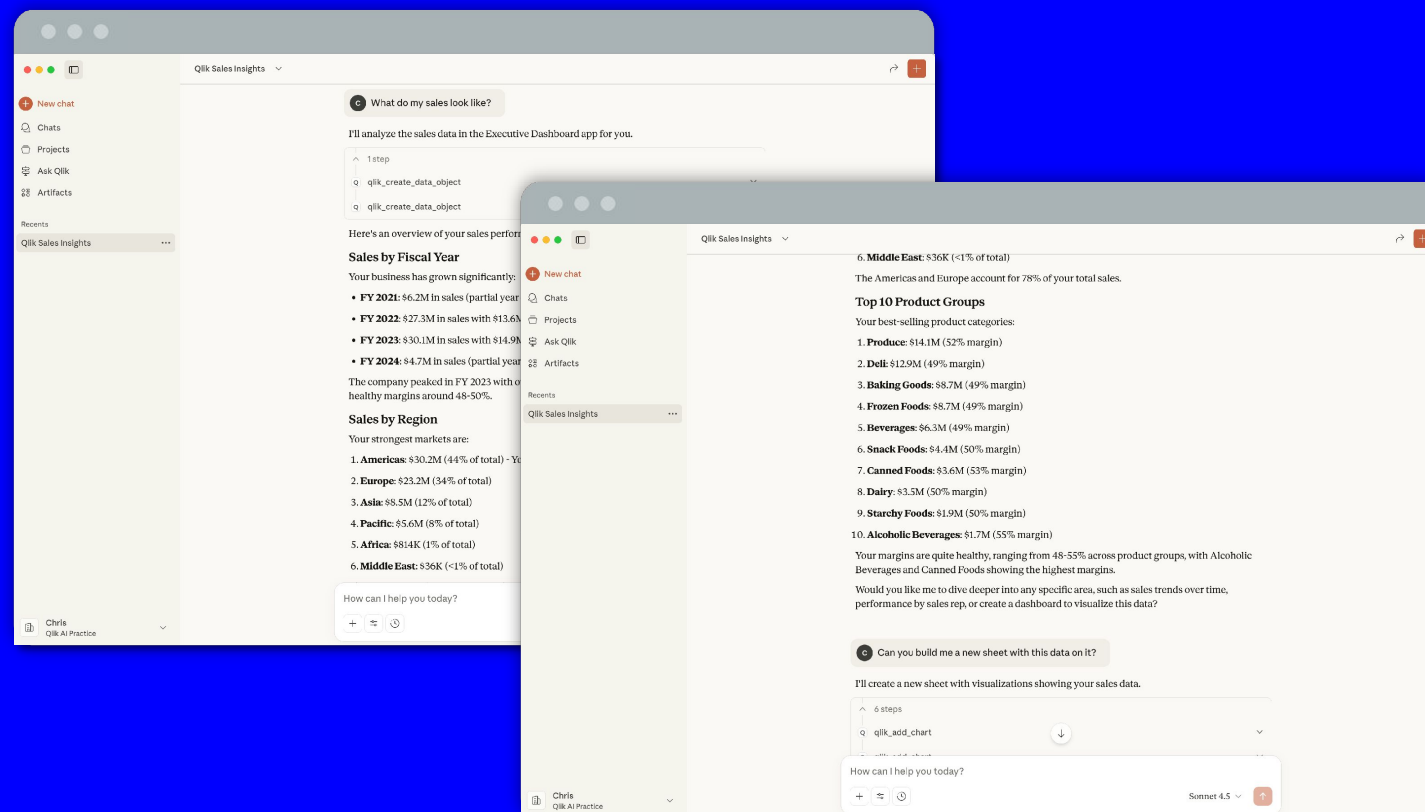

What regions are using the most energy? What are some of the reasons for this?
Give me a plan to improve energy efficiency...

Qlik MCP server

The doorway between AI and trusted intelligence

- Elevate Insight from all AI
 - The most complete, contextually relevant insight from Qlik, using all your data, with support for AI reasoning through fast, incremental calculations
- Automate Tasks and Workflows
 - Use the power of AI to automate and execute complex tasks for data integration, analytics creation, workflows and more
- Deliver Trusted Intelligence
 - Let AI tap into Qlik's trusted data products, game-changing analytics engine, and innovations in agentic reasoning

Click Discovery Agent

Automatic anomaly detection and summarization of critical data changes

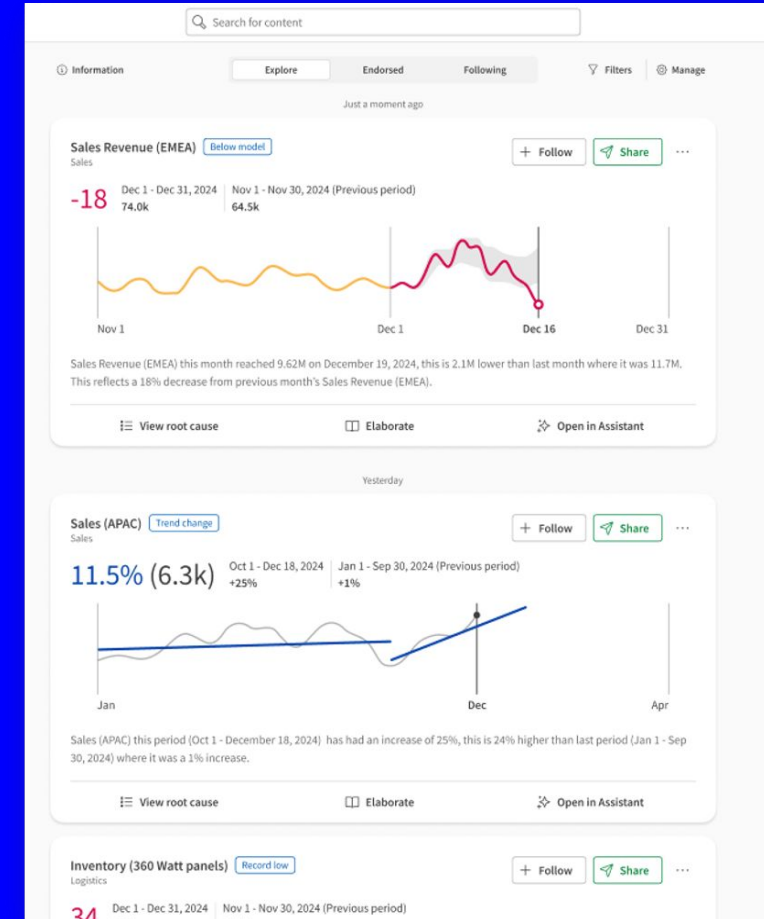

Discovery Agent continuously **detects** and **summarizes** the most important changes in your data so your teams can act **before** issues escalate.

It monitors your Qlik Cloud apps behind the scenes and delivers clear, prioritized insights directly to users.

~~No rigid rules.~~

~~No predefined thresholds.~~

~~No manual monitoring.~~

A broad range of detection

Uncovering anomalies and outliers

Change in Trend

Detects meaningful shifts in trend direction or slope.

Spike Detection

Catches short-lived peaks or dips in metrics.

Record Highs/Lows

Identifies new all-time high or low values.

Forecast

Surfaces deviation from expected performance.

Divergence

New

Detects permanent shifts in a metric's baseline.

Baseline/Normal

Data Quality Issues

Flags gaps, errors, or unusual patterns in data.

Discovery Agent adapts to real-world data, not predefined rules.

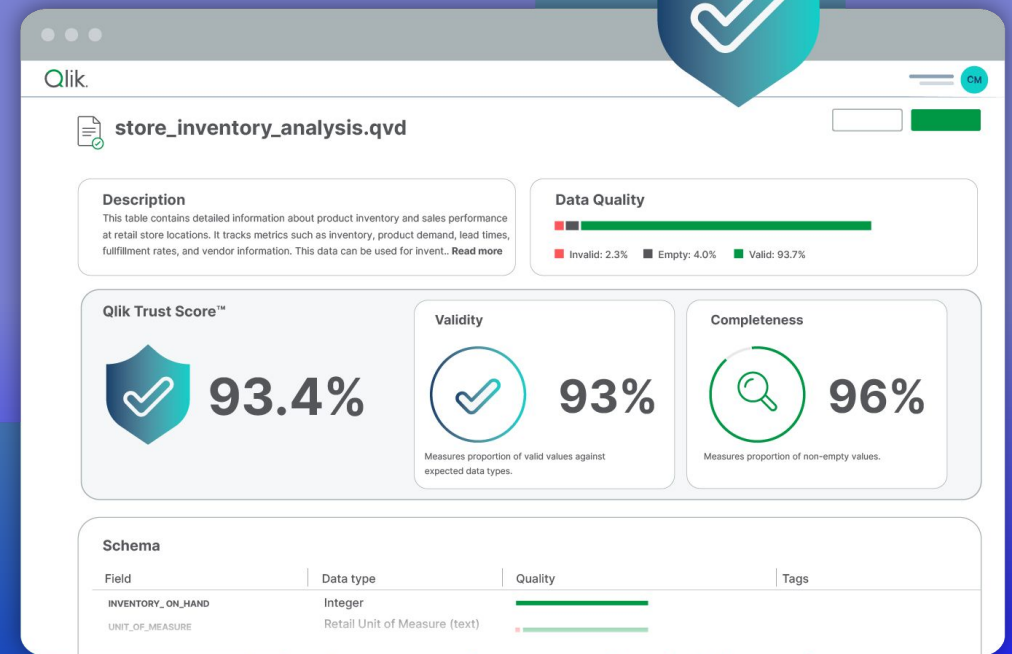

Qlik Data Products

Now available in Qlik Cloud Analytics

- Get curated, ready-to-use, governed and context-rich data sets
- Continuously assess, monitor, and improve the reliability of your data
- Elevate the value of your QVDs with management, reuse and trust scores

Q&A

Tecnologia che funziona.
Continuità che protegge.
Innovazione che crea valore.

Abacus. Stay Ahead.
